*Reasons for Allowance*

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a powder containing a physiologically active peptide, wherein the powder comprises particles which comprise a physiologically active peptide and mannitol in a weight proportion of from 1:1 to 1:50, the particles further comprising per one part by weight of the physiologically active peptide at least one of anionic surfactant in an amount of 0.05-3 parts by weight, hydrogenated lecithin, and a binder selected from the group of polyvinylpyrrolidone, polyvinylalcohol, a water-soluble, non-ionic, cellulose derivative, and mixtures thereof, in an amount of 0.05-6 parts by weight.

Although Bergstrand et al. (U.S. Patent 6,103,697) (August 15, 2000) teaches a powder containing a synthetic peptide and suggests that the peptide may be admixed with an adjuvant or a generic carrier like mannitol, sorbitol, starch, or saccharose etc., Bergstrand et al does not teach the particular peptide and mannitol ratio of from 1:1 to 1:50, the particles further comprising per one part by weight of the physiologically active peptide at least one of anionic surfactant in an amount of 0.05-3 parts by weight, hydrogenated lecithin, and a binder selected from the group of polyvinylpyrrolidone, polyvinylalcohol, a water-soluble, non-ionic, cellulose derivative, and mixtures thereof, in an amount of 0.05-6 parts by weight.

In view of the absence of either teaching or suggestion of such a powder containing a physiologically active peptide, wherein the powder comprises particles which comprise a physiologically active peptide and mannitol in a weight proportion of from 1:1 to 1:50, the

Art Unit: 1634

particles further comprising per one part by weight of the physiologically active peptide at least one of anionic surfactant in an amount of 0.05-3 parts by weight, hydrogenated lecithin, and a binder selected from the group of polyvinylpyrrolidone, polyvinylalcohol, a water-soluble, non-ionic, cellulose derivative, and mixtures thereof, in an amount of 0.05-6 parts by weight, the present invention is novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*
